SUMMARY

Motivated Computer Science undergraduate with a focus on software engineering and full-stack development. Experienced in building web applications, developing RESTful services, and working with modern web technologies. Familiar with Java, Spring Boot, Laravel, React, Next.js, and database-driven systems. Completed research on blockchain-based auditing, with an interest in developing reliable, efficient, and scalable software solutions. Eager to apply software engineering principles and contribute to real-world development projects.

EDUCATION

BSc. (Hons) in Computer Science and Technology
Uva Wellassa University, Sri Lanka

G.C.E. Advanced Level Examination
Ananda Central College, Elpitiya

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, PHP
- **Frameworks and Libraries:** Next.js, Laravel, Spring Boot, React.js, Tailwind CSS
- **Databases:** MySQL, MongoDB
- **Tools and Technologies:** Git, JWT, REST APIs, Vite, Postman

WORK EXPERIENCE

Software Developer Intern, Amazoft, Sri Lanka **Jun 2026 - Present**

- Developed and enhanced web pages and features within the existing project architecture.
- Performed QA, regression, and responsive testing across implemented features.
- Collaborated with the development team and worked with an existing production codebase.

PROJECTS

Codient – Online Code Judge System **2026 - Ongoing**

- Developing a full stack platform for automated evaluation of programming solutions with multi language support.
- Designed a secure code execution engine using Docker containers to safely run untrusted user submissions with resource limits.
- Implemented asynchronous job processing using Redis to handle concurrent code submissions efficiently.
- Built RESTful APIs with Node.js for problem management, submission handling, and result evaluation
- Tech stack: React, Node.js, Redis, Docker, PostgreSQL

Developer Hub – Real-Time Developer Community Platform **2025**

- Built a full-stack developer platform using Laravel, React, and Inertia.js with a custom terminal-inspired dark UI.
- Implemented real-time discussions and live content updates leveraging Laravel Reverb (WebSockets) and Laravel Echo.
- Designed a gamified reputation system featuring peer upvoting, user scoring, and Markdown code syntax highlighting.
- Engineered a secure admin suite with role-based access control (RBAC), audit logging, and full content moderation tools.

WoodWise - Furniture Store Management System **2025**

- Built a full-stack system using the MERN stack to manage store inventory and enhance customer experience.
- Developed inventory and order management modules.
- Implemented 3D model previews and AI-based furniture image generation.

RentIt - Online Renting Platform **2025**

- Developed a web application for renting and lending household items using React, PHP, and MySQL.
- Designed and implemented user dashboards and item listing modules.
- Integrated authentication and transaction tracking features.

RESEARCH

Generalized Auditing System for Financial Transactions Using Blockchain **2025 - 2026**

- Built a permissioned Hyperledger Fabric audit platform with multi-org MSP identities and custom chaincode for immutable audit lifecycle management across SME, auditor, and admin roles.
- Designed blockchain-backed audit orchestration using Fabric Gateway, JWT auth, MongoDB persistence, and AES-256 encrypted report storage for secure, auditable data flow.
- Implemented tamper-evident audit provenance with ledger history queries, hash-based verification, role-based access control, and blind-audit/privacy controls for compliance-grade reporting.

CERTIFICATIONS

- **Learning Python -** LinkedIn Learning
- **Docker for Developers -** LinkedIn Learning
- **Node.js Essential Training -** LinkedIn Learning
- **Spring Boot 3 Essential Training -** LinkedIn Learning
