SUMMARY

Motivated Computer Science undergraduate with a focus on software engineering and full stack development. Experienced in building web applications, designing RESTful services, and working with modern frameworks. Proficient in Java, Spring Boot, React, and database driven systems. Currently engaged in research on blockchain based auditing to improve secure data processing. Interested in applying engineering principles to develop reliable, efficient, and scalable software systems.

EDUCATION

BSc. (Hons) in Computer Science and Technology **2022 - 2026**
Uva Wellassa University, Sri Lanka

G.C.E. Advanced Level Examination **2020**
Ananda Central College, Elpitiya

RESEARCH

Generalized Auditing System for Financial Transactions Using Blockchain **2025 - Ongoing**

- Architected and developed a scalable middleware layer using FastAPI to bridge traditional application backends with a permissioned blockchain network.
- Designed and deployed custom smart contracts (chaincode) on Hyperledger Fabric to establish secure, immutable audit trails for system events.
- Engineered verifiable data pipelines that enhanced application transparency, security, and data integrity.

PROJECTS

Codient – Online Code Judge System **2026 - Ongoing**

- Developing a full stack platform for automated evaluation of programming solutions with multi language support.
- Designed a secure code execution engine using Docker containers to safely run untrusted user submissions with resource limits.
- Implemented asynchronous job processing using Redis to handle concurrent code submissions efficiently.
- Built RESTful APIs with Node.js for problem management, submission handling, and result evaluation
- Tech stack: React, Node.js, Redis, Docker, PostgreSQL

MovieSphere - Movie Discovery & Management Platform **2025**

- Full-stack movie app (React + Spring Boot) with JWT authentication, role-based admin controls, and TMDB integration.
- Responsive UI (Tailwind CSS/Bootstrap), movie CRUD operations, React Router navigation, and RESTful API integration.

WoodWise (Furniture Store Management System) **2025**

- Built a full-stack system using the MERN stack to manage store inventory and enhance customer experience.
- Developed inventory and order management modules.
- Implemented 3D model previews and AI-based furniture image generation.

RentIt (Online Renting Platform) **2024**

- Developed a web application for renting and lending household items using React, PHP, and MySQL.
- Designed and implemented user dashboards and item listing modules.
- Integrated authentication and transaction tracking features.

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, PHP
- **Frameworks & Libraries:** Spring Boot, Node.js, React, Tailwind CSS
- **Databases:** MySQL, MongoDB, PostgreSQL
- **Tools & Technologies:** Git, JWT, REST APIs, Vite, Postman

SOFT SKILLS

- Teamwork
- Critical thinking
- Time management
- Effective communication
- Problem solving

CERTIFICATIONS

- **Learning Python -** LinkedIn Learning
- **Docker for Developers -** LinkedIn Learning
- **Node.js Essential Training -** LinkedIn Learning
- **Spring Boot 3 Essential Training -** LinkedIn Learning
